

torino™

electroceutical™ therapy system

Ivivi Torino is a non-invasive pulsed electromagnetic field device (PEMF), FDA-cleared for the treatment of pain and edema in soft tissue. CMS has issued a National Coverage Determination for the use of PEMF with chronic wounds. You can now easily provide the well-known benefits of electrotherapy to your patients without any disruption in your current treatment and recovery protocols. Ivivi's Torino provides an affordable, disposable product that can be secured directly over dressings and activated to automatically deliver therapy throughout the day.

ivivi_torino

Features:

- Ivivi makes electrotherapy easy to use by anyone
 - Simple, easy to use, affordable therapy
 - Treats directly through dressings, clothing, casts, compression garments, etc.
 - Lightweight, conformable applicators easy to position and affix for therapy
 - Point and shoot operation, delivers optimal treatment regime automatically
- Requires no special preparation of treatment site
- No known side-effects
- Non-pharmaceutical, non-invasive

Benefits:

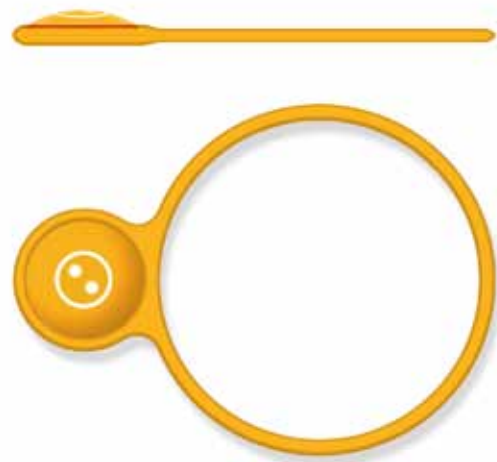

- Efficacy well-documented
- Virtually labor-free
- Easily administered by almost anyone
- Compatible with other adjunctive therapies
- Automatic “point and shoot” therapy

Outcomes:

- Electrotherapy outcomes are widely documented as effective
- Over 650,000 treatments
- No known side-effects
- Cost reductions:
 - No specialized staff required
 - No daily disposables

Ivivi Technologies is a medical technology company devoted to delivering the finest, most efficacious electrotherapies to clinical care in highly flexible forms that can be readily integrated into any clinical protocol. The team at Ivivi conducts ongoing basic science research to better target specific physiological processes with more sophisticated signals. Clinical feedback

from dedicated clinicians is incorporated into the design process, ensuring that the technologies from Ivivi are easily used in everyday clinical practice. From the mechanism of action to the bedside, Ivivi Technologies is creating a new standard of care that offers safe, effective, non-invasive targeted electrotherapy.
