

### The Right Solution for Your Resident

The Joerns® Dermafloat® series of therapeutic support surfaces are designed for the prevention and treatment of pressure ulcers up to Stage IV. Four different surfaces allow you to select the appropriate therapeutic support based on the resident's individual skin care needs.

**DermaFloat LAL**

**DermaFloat APL**

**DermaFloat APM**

**DermaFloat LR**

#### DermaFloat Features:

- CPR quick deflation
- Integrated bracket to attach to bed
- Panel lockout feature
- Two-year warranty on the mattress and one-year on warranty on the cover, control units and electrical components.

#### Benefits:

- Treated with a highly effective bacteriostatic agent to inhibit the growth of bacteria and fungus
- Constructed from a very smooth nylon fabric with low friction and low shear properties to protect the resident's skin from damaging friction/shearing forces
- Breathable, moisture vapor permeable fabric allows air to circulate beneath the pad and wicks away excess moisture. This keeps your resident dry and helps to prevent skin maceration.

#### CairRails

Joerns Healthcare is concerned about resident and caregiver safety. Our proprietary risk management CairRails offer a bilateral side bolster solution designed to address healthcare's growing concerns of liability in relation to resident falls and entrapment.

#### Therapy Pad

Many healthcare facilities are facing the challenge of infection control. Joerns' quilted therapy covers are treated with an antimicrobial to protect the therapy pad itself from the growth of mold, mildew and bacteria.
