

Convertible Air / Foam Therapy System

As a Non-Powered Therapeutic Surface

- ◊ Reproduces the surface pressure profile of low air loss with three-zone, inner air core system (shoulder, torso and foot)
- ◊ Maintains optimal air pressure in each therapy zone regardless of patient weight and profile via our patented P.R.O. Technology® valve technology
- ◊ Enhances pressure redistribution and comfort with 1" viscoelastic topper
- ◊ Firm perimeter provides stability during patient care and contributes to patient safety by eliminating gaps between frames and side assists
- ◊ Zippered, fluid-proof and stain-resistant therapy pad provides low friction and shear to the surface

Add Alternating Pressure Therapy with Powered Control Unit

- ◊ Converts to provide alternating pressure therapy with attachment of optional control unit
- ◊ Three alternating pressure zones, including the delicate heel section for optimal pressure redistribution
- ◊ Three modes of operation:
 - **Autofirm** assists patients and caregivers during patient transfer and treatment
 - **Therapy** control settings provides powered immersion and flotation for excellent pressure redistribution
 - **Alternating** cycle time options of 5, 10, 15 and 20 minutes
- ◊ Closed loop control system eliminates concerns of changes in mattress interface pressure due to patient repositioning and ambient temperature changes

Mattress Specifications

MAXIMUM WEIGHT CAPACITY¹

500 lb

MATTRESS DIMENSIONS

Width: 36" (91.4cm) or 42" (106.7cm)

Length: 80" (203.2cm) or 84" (213.4cm)

Height: 7" (17.8cm)

COVER

Zippered Nylon or 4-way Stretch

FLAMMABILITY STANDARD

TB 117, TB 129, 16 CFR 1633 and BFD IX-11

WARRANTY

Mattress: 5-years

Cover: 1-year

¹Mattress weight capacity only; total weight must not exceed bed frame manufacturer's specified load capacity. Joerns reserves the right to change specifications without notice.

Optional Control Unit Specifications

| Feature | P.R.O. Technology Control Unit |
|---------------------------|--|
| DIMENSIONS | 12.4" W x 7.7" H x 4.3" D (31.5 cm W x 19.5 cm H x 4.3 cm D) |
| WEIGHT | 6 lb (2.7 kg) |
| COMFORT SETTINGS | 5 |
| CYCLE TIMES | 5, 10, 15, 20 minutes |
| MODES OF OPERATION | 3 - Autofirm, Alternating and Therapy |
| LOCKOUT | Yes |
| LOW PRESSURE ALARM | Yes |
| WARRANTY | One-year |
| AGENCY APPROVALS | IEC 60601-1 / IEC 60601-1-2 / EN 60601-1-11, CAN/CSA C22.2 No. 60601-1 |
| ELECTRICAL SPECIFICATIONS | 100-240V AC, 50/60Hz, 0.2-1A |

Clinical Indications

PRESSURE REDISTRIBUTION

Stage 1-4 Pressure Injuries²; Rehabilitation; Burns; Neurology; Dermatology; Amputations

PAIN MANAGEMENT

AIDS; Arthritis; Oncology

²In the non-powered mode, the ProCair Plus design allows the provision of optimal interface pressures through controlled air cell inflation for at-risk patients in the prevention and treatment of Stage 1 and 2 pressure injuries, and treatment of uncomplicated Stage 3 and 4 pressure injuries in patients with multiple turning surfaces. For Stage 3 and/or Stage 4 treatment, care staff should be able to position the patient off of the pressure wound in at least 2 positions.

In the powered alternating pressure mode, the ProCair Plus adds the benefit of cyclic offloading for advanced treatment of uncomplicated Stage 3 or 4 pressure injuries for patients where such therapy may improve pressure redistribution and circulation. In all cases, Joerns clinical indications are guidelines and should be taken only as recommendations for consideration during individual patient assessment by the clinician.
